

Safe Staffing Campaign — Briefing Note

The issue

Regional health centres are reporting shifts staffed below safe nurse-to-patient ratios, particularly on night shifts.

What MHPU is asking for

A minimum staffing ratio enforceable across all public health facilities, with transparent reporting of shortfalls.

How to support

Sign the petition, share your own experience confidentially with your regional rep, or attend a local briefing session.

This is a placeholder document generated for demonstration purposes and should be replaced with MHPU's approved content.
